- The welcome page includes a navigation bar, a image with an overlay title, introductory text, and a grid of links to the main sections of the site.
- The navigation bar uses <nav> and a of links. It is positioned over the image using position: absolute, centered with flex, and styled with a semi-transparent background for A dark overlay for the image is created using the ::before pseudo-element so text remains visible.
- The main content uses a <div> structured with CSS Grid. The grid layout is defined using:grid-template-columns: repeat(auto-fit, minmax(300px, 1fr)); so the number of columns adjusts automatically based on screen size.
- Each content card uses hover animations for a more interactive feel. The page uses media queries (at max-width: 770px) to switch the navigation bar and footer to a vertical layout on mobile screens.

My Early Years in Rome

I was born in Rome, Italy, one of the most fascinating cities in the world. I spent the first five years of my life surrounded by history, art, and the sound of Italian streets. Rome is not just ancient monuments; it's a living museum filled with passion and tradition. From the Colosseum to the Vatican, every corner tells a story that connects centuries of culture, architecture, and human creativity.

Growing up there taught me to appreciate beauty and diversity. Italians are known for their warmth, their love of food, and their joy in life – values that I still carry with me today.

Baking

Another passion of mine is baking – something I've been doing since I was thirteen. I started by taking small pastry courses to learn how to make macarons and cakes, and later turned that hobby into a small business, selling homemade cakes to friends and family. Baking gives me the same sense of focus that swimming does: it's a balance of precision and creativity, science and emotion. There's something deeply satisfying in creating something with your own hands that brings joy to others.

MY HOBBIES

Swimming

Swimming has always been more than just a sport for me – it's a rhythm that connects body and mind. I practiced swimming for two years, from the age of fourteen to sixteen, and took part in several competitions, achieving my best result with a second-place finish. Each time I dive into the water, I feel a calm clarity, as if every stroke washes away the noise of the world. It taught me discipline, patience, and the peace that comes from persistence.

- The page uses the `<nav>` tag for the navigation bar so the browser knows this is the main menu of the website. Different parts of the page (Rome, Moldova, hobbies) are inside `<section>` tags. These tags show that each part is its own topic.
- Headings like `<h1>`, `<h2>`, and `<h3>` are used to create titles and subtitles. This helps both readers and search engines understand the structure of the page. The text is written inside `<p>` tags, which mark normal paragraphs.
- Images use the `` tag with an alt description so screen readers can understand the picture.
- The bottom of the page uses the `<footer>` tag for social media, links, and contact information. This shows that the content belongs to the end of the page.

ANDREA ROȘCA

Nationality: Moldovan, Romanian

Date of Birth: 09/08/2006

Email: roscaandrea4@gmail.com

EDUCATION

High School Diploma

Liceul Teoretic "Mihail Berezovschi"
– Chișinău

Graduated: 2024

TOEFL Certificate

Score: 95 / 120
Issued: 2024

Certiport IT Certifications

- Information Technology Specialist in Networking (2024)
- JavaScript Certification (2024–2025)
- Databases Certification (2025)

VOLUNTEERING EXPERIENCE

Youth Center Chișinău

Volunteered at the Chisinau Youth Center, participating in events that supported young people's education, personal growth, and creativity. Helped organize workshops and community initiatives aimed at youth empowerment.

LANGUAGE SKILLS

Language	Listening	Reading	Speaking	Writing
Romanian (native)	C2	C2	C2	C2
English	C1	C1	C1	C1
Italian	A2	A2	A1	A1
Russian	A2	A2	A1	A1

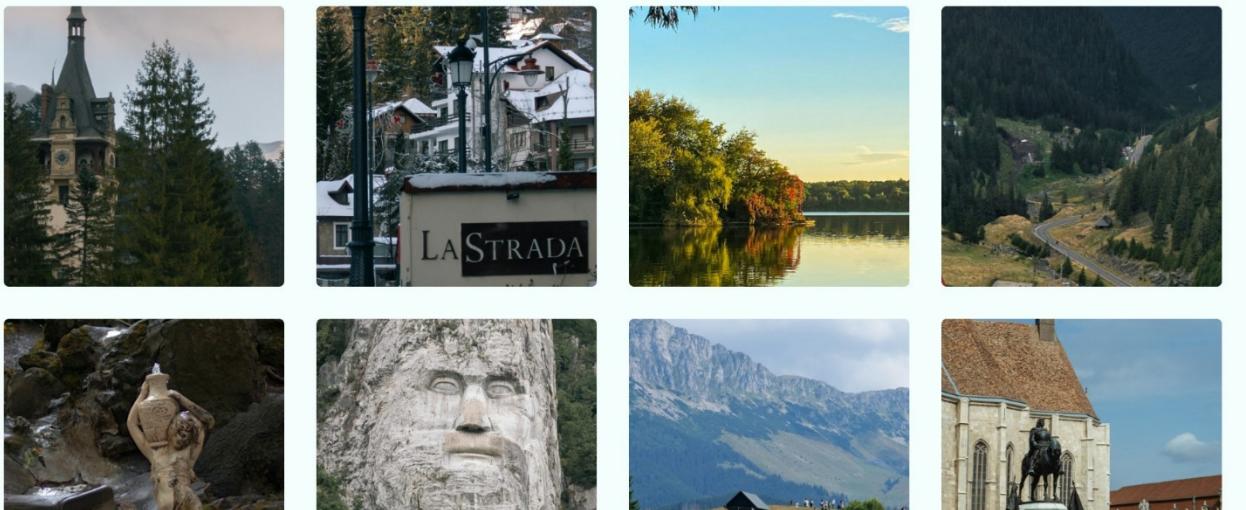

- The page uses the <section> tag to divide the CV into clear parts (education, skills, work experience, etc)
- It contains the main title (<h1>) and a short description (<p>). Titles inside the page use <h2> and <h3>, which help create a clear structure with main topics and smaller topics. Normal text is written in <p> tags, which mark the content as paragraphs
- The table on the page uses <table>, <tr>, <td>, and <th> to show language skills in a clean, structured way.
- The CV sections use a grid layout, created with CSS Grid:grid-template-columns: repeat(auto-fit, minmax(250px, 1fr)); This means the items automatically rearrange depending on screen size.
- The page includes responsive design, so on smaller screens the padding gets smaller and the grid stacks into a single column, making everything readable on phones.

Some pictures that I took

- The images are displayed using the tag, and each image has an alt attribute so screen readers can describe the picture.
- The two groups of pictures (gallery1 and gallery2) are arranged using CSS Grid, withgrid-template-columns: 1fr 1fr 1fr 1fr; to create a 4-column layout.
- Hover effects on images are made with transform: scale(0.95), giving a small zoom-out animation when the user moves the mouse over them.
- With a media query (@media max-width: 770px), the galleries change to two columns on smaller screens, making the page responsive and mobile-friendly.

Nature of Romania

Contact Form

The contact form consists of four input fields and one message area:

- First Name
- Last Name
- E-Mail
- Enter text

Below the message area is a "Send Message" button.

- The contact form is created using the <form> tag, which sends the user's message to Formspree when the button is clicked.
- Inside the form, different types of inputs are used:<input type="text">, <input type="email">, and <textarea>. These tags let users write their name, email, and message.
- Each input has a placeholder so users know what to type.
- The inputs use rounded borders, padding, and hover/focus effects to make the form easier to use. When a user clicks inside an input, a CSS focus effect changes the border color and adds a soft shadow so it's clear which field is active.

F1 Teams 2024

Scuderia Ferrari

Founded in 1929, Ferrari is one of the most iconic teams in Formula 1 history, representing speed, passion, and excellence.

Mercedes AMG Petronas

Mercedes dominated the hybrid era, known for precision engineering and championship-winning performance.

Red Bull Racing

Innovative and aggressive, Red Bull continues to challenge for the top spot in Formula 1.

McLaren

One of the oldest F1 teams, McLaren has a long history of success and technological innovation.

Aston Martin

Elegant design meets performance – Aston Martin brings style and power to the F1 grid.

MY FAVOURITE DRIVER

Lewis Hamilton is a British Formula One driver born on January 7, 1985, in Stevenage, England. He entered F1 in 2007 and immediately impressed the world with his talent, winning his first World Championship just one year later. Over the years he has become one of the most successful drivers in history, earning seven World Drivers' Championships and setting multiple records, including the most pole positions and podium finishes. Hamilton is known for his incredible racecraft, determination, and ability to deliver when it matters most. Beyond his achievements on track, he has used his platform to advocate for diversity, equality, and environmental initiatives. His impact reaches far beyond motorsport, establishing him as both a racing legend and a positive force for change in the world.

My Favourite Team: Ferrari

Ferrari is more than just a Formula 1 team – it's a symbol of racing heritage, passion, and excellence. With over 240 race victories and 16 Constructors' Championships, Ferrari remains the most successful and iconic team in the history of Formula 1.

In 2024, I had the amazing opportunity to attend the Monza Grand Prix in Italy – the home race for Ferrari. The atmosphere was electrifying, filled with the energy of the "Tifosi" fans waving red flags and cheering for their heroes. Watching Charles Leclerc win at Monza was an unforgettable experience – seeing the red sea of

Ferrari supporters celebrate was something truly magical.

- The F1 teams are displayed using CSS Grid:`grid-template-columns: repeat(auto-fit, minmax(220px, 1fr));`This creates a responsive card layout that adjusts based on screen size.
- Each team card is a box with a hover effect (`transform: translateY(-5px)`), making the layout more dynamic.
- The Lewis Hamilton section uses a two-column grid, placing text on one side and an image on the other.On smaller screens, the grid becomes one column.
- The Ferrari section includes both text and a video, added with the `<video>` tag, allowing playback controls.
- The Ferrari photo gallery uses another responsive CSS Grid, so the images resize nicely and change layout depending on screen width.
